What is Tic Tac Toe?
3x3 grid
Player 1 places an X
Player 2 places an O
Alternating turns
Game plays until space runs out or a player wins
First to get three of their symbols in a row wins

Check if a player won after every placement
If there is a winner display a winner screen showing who won

I am currently just working on fixing what the others added so it works well and as intended, taking the method and classes they made and just putting them together in a way that works
